Project Undertaken:

Title	Description	Members	Duration
Multiple Face Detection and Attendance using OpenCV	The attendance of students is a major concern in many educational institutions. In this project, the attendance in a class will be monitored by the class camera and system will compare the features of the each student face with the trained database and generates the attendance of the student. Therefore this project increases teaching-learning time between teacher and students.	4	1 year(2019-20)

Extra-curricular Activities:
